

Features of Lumin Lighting LED high bay

1. Excellent heatsink design
2. Reliable LED light source from Bridgelux, Philips and Epistar
3. Trusted LED driver from Taiwan Meanwell
4. Classic shape design, similar to traditional high bay light
5. PC cover and aluminum cover available for choice
6. SKD packaging design for products, saving cost

Lumin Lighting Classic LED high bay LM-H001 is a reliable product in our product range. The big aluminum heatsink fixture helps solve the heat dissipation problem. More importantly, the well-known reliable Meanwell driver is used so that there is no risk to fail after it works for a long time. The two kinds of lampshade covers are provided according to applications: one is PC cover, good for commercial use, the other is aluminum cover, good for industrial use.

Applications:

- (1) Commercial areas: It' s used in some restaurants, pub, stores, and shops, etc.
- (2) Industrial areas: It' s used in the factory, warehouse, and workshop, etc.
